Why Choose Us 25

ABOUT URBANRUPEE

A unified payment ecosystem built for modern businesses.

Urbanrupee is a connected payment platform that brings acquisition, checkout, affordability, and operations into one single stack so businesses will stop managing payments in pieces and start running them as a full - fledged ecosystem.

Whether you need intelligent routing across providers, customized checkout that converts, flexible payment options for customers, or clear visibility into every settlement. Urbanrupee gives you the infrastructure to collect, convert, and control with scalability.

ORCHESTRATE

Connect and route payments intelligently across multiple gateways.

RELIABILITY

Customized checkout experiences that brings reliability.

ENABLE

Enable multiple payment modes that unlock more transactions.

CONTROL

Monitor transactions, settlements, and performance from one stack.

We Solve

THE PAYMENT CHALLENGE

Payments should not be this complicated.

As payment journeys become more diverse, businesses need more than a way to accept payments. They need infrastructure that can route, convert, enable and control every transaction with confidence.

1 PAYMENT FAILURES

Failed transactions break the customer journey and reduce completion rates. Businesses need intelligent routing and reliable rails that keep payments moving at scale.

2 FRAGMENTED PAYMENT SYSTEMS

Multiple gateways, methods and integrations create operational complexity. Businesses need one unified layer to connect, manage and scale payment infrastructure.

3 CHECKOUT FRICTION

Customers expect payment journeys to be fast, simple and trusted. Businesses need branded checkout experiences that reduce drop offs and improve conversion.

4 LIMITED PAYMENT VISIBILITY

Transactions, settlements and performance insights are often scattered across systems. Businesses need one clear view to monitor, reconcile and act with control.

Urbanrupee brings the payment journey together from checkout to transaction to insight.

We Offer

URBANRUPEE ECOSYSTEM

Technology that powers the complete payment experience.

From payment infrastructure and branded checkout to collections, payouts, settlements and risk control, Urbanrupee gives businesses one connected stack to manage money movement end to end.

PRODUCTS

- UNIFIED MERCHANT DASHBOARD
- WHITE LABEL PAYMENT EXPERIENCE
- HOSTED AND BRANDED CHECKOUT
- PAYMENT ORCHESTRATION
- HYPER CHECKOUT EXPERIENCE
- SEAMLESS UPI SWITCH

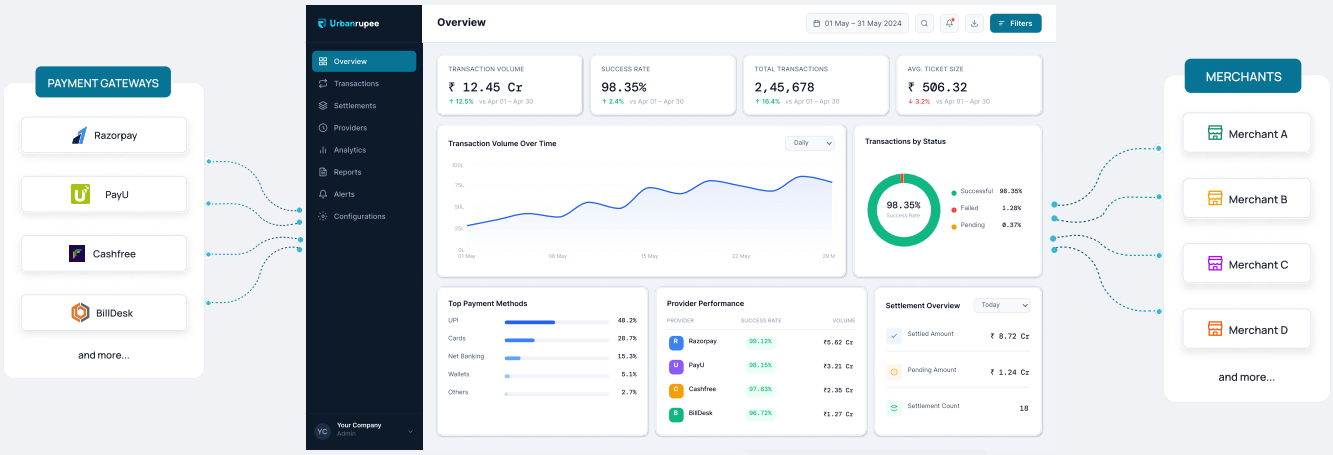
SERVICES

- COLLECTIONS
- WITHDRAWALS
- FINANCIAL OPERATIONS INFRASTRUCTURE
- RISK AND FRAUD MANAGEMENT
- SETTLEMENT AND RECONCILIATION

From accepting money to moving it, managing it and understanding it, Urbanrupee connects the complete financial journey.

Products

01 / UNIFIED MERCHANT DASHBOARD



Urbanrupee Unified Dashboard brings payment activity, transaction monitoring, settlements and analytics into one centralized view. It simplifies payment operations and gives businesses the visibility to track performance, spot trends and make faster decisions.

KEY METRICS

80%
Faster issue resolution

92%
Lower manual operations effort

90%
Faster reporting turnaround

95%
Payment success visibility

- ✓ Single payment command center
- ✓ Real time transaction visibility
- ✓ Settlement and report tracking
- ✓ Provider performance insights

UNIFIED DASHBOARD BENEFITS

Everything you need to monitor, manage, and optimize your payment operations brought together in one unified dashboard.

Unified Visibility

Get a centralized view of payment activity, transaction status, settlements, providers, MIDs, and chargeback exposure in one place.

Simplified Operations

Manage day to day payment operations through a single interface instead of switching between gateways, reports, and support workflows.

Smarter Routing Control

Track provider performance, MID usage, fallback routes, and cascading activity to improve payment continuity and success rates.

Chargeback Readiness

Monitor dispute status, held funds, response timelines, and evidence handling so teams can act faster and stay in control.

KEY CAPABILITIES

→ Centralized Visibility

Access transaction activity, settlements, reports, and payment operations from one dashboard.

→ Chargeback Management

Track chargeback cases, monitor held balances, manage evidence submission, and stay aligned with response timelines.

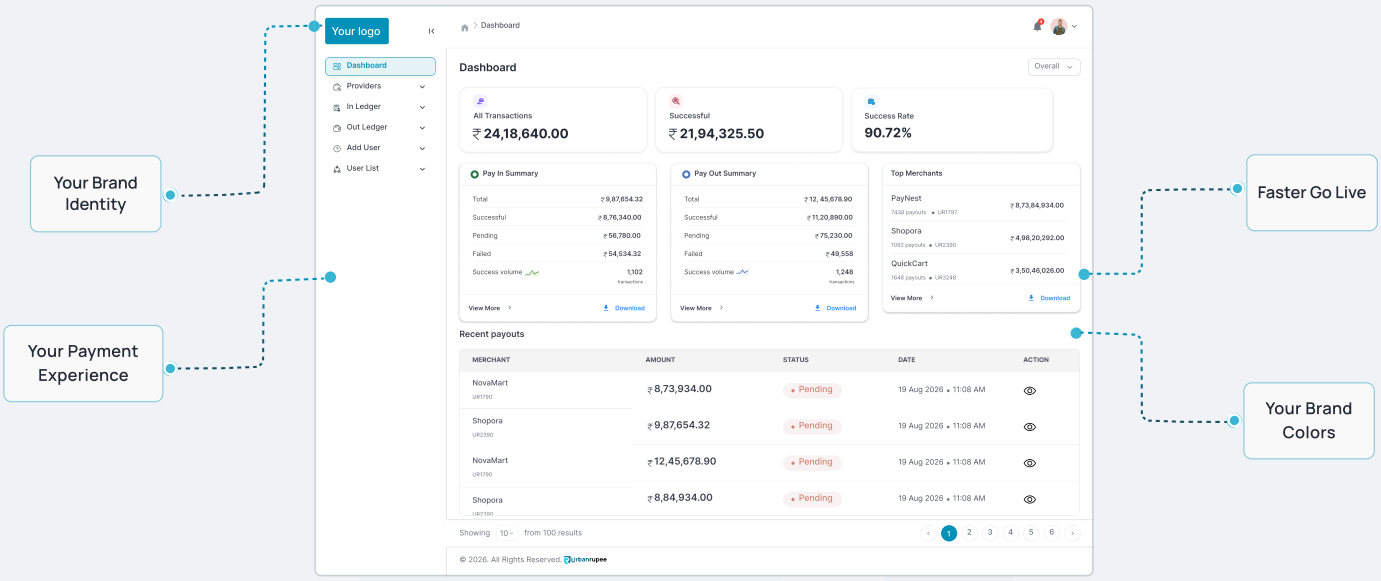
→ MID Cascading Visibility

See how traffic is routed across providers and MIDs, where fallback happens, and how cascading improves continuity.

→ Performance Insights

Monitor payment trends, transaction outcomes, provider performance, and operational patterns to identify improvement opportunities.

02 / WHITE - LABEL PAYMENT EXPERIENCE



Urbanrupee enables businesses to launch a branded payment experience without building the entire payment layer from scratch. From checkout appearance and payment mode visibility to the overall user journey, merchants can deliver payments under their own brand while Urbanrupee powers the infrastructure behind the scenes.

With faster deployment, flexible branding controls, and a unified backend foundation, businesses can create payment experiences that feel consistent, trusted, and ready to scale.

- ✓ Logo and Brand Name
- ✓ Colors and Visual Identity
- ✓ Unified Infrastructure
- ✓ Checkout experience
- ✓ Payment Mode Visibility

WHY WHITE LABEL SOLUTIONS?

01

Reduce Complexity

Launch a branded payment experience without managing multiple systems, disconnected interfaces, or fragmented provider relationships.

02

Strengthen Brand Ownership

Deliver checkout journeys that reflect your brand identity through customized logos, colors, and visual styling.

03

Go Live with Confidence

Combine brand control with Urbanrupee's payment infrastructure, routing capabilities, and operational support in one connected experience.

WHITE LABEL SOLUTION FEATURES

→ Reduce Complexity

Launch a branded payment experience without managing multiple systems, disconnected interfaces, or fragmented provider relationships.

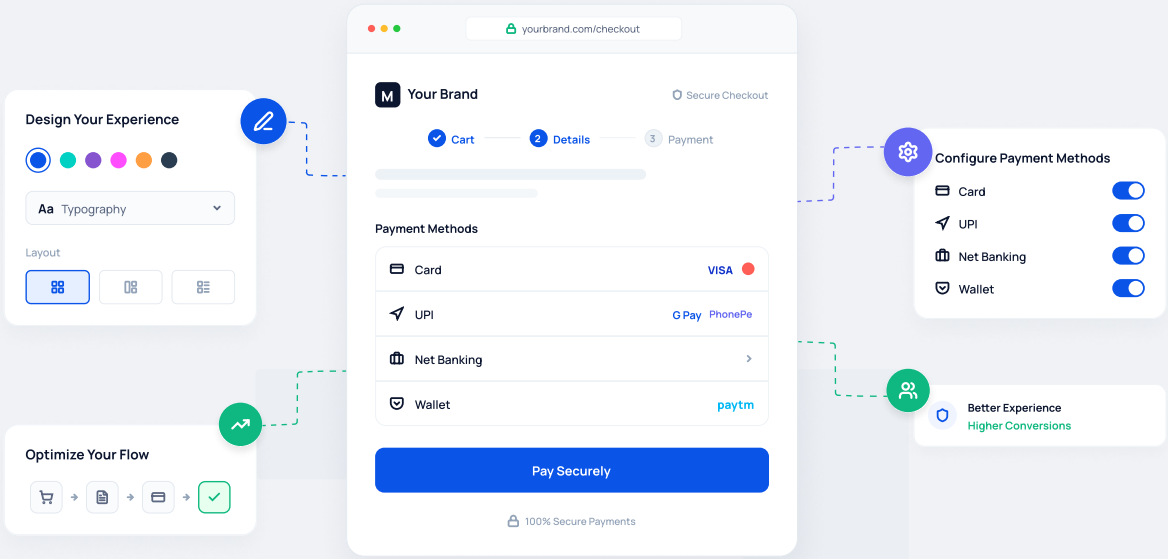
→ Strengthen Brand Ownership

Deliver checkout journeys that reflect your brand identity through customized logos, colors, and visual styling.

→ Go Live with Confidence

Combine brand control with Urbanrupee's payment infrastructure, routing capabilities, and operational support in one connected experience.

03 / HOSTED & BRANDED CHECKOUT



Urbanrupee helps businesses launch hosted checkout experiences that are fast, branded, and built for conversion. Merchants can customize how checkout looks, control visible payment methods, and deliver a smoother payment journey without building the payment stack from scratch.

With flexible design controls, hosted deployment, and a customer centric flow, Urbanrupee enables businesses to create checkout experiences that feel trusted, consistent, and ready to scale.

It gives merchants greater control over the payment experience while reducing dependency on complex internal builds.

The result is a checkout journey that is easier to launch, easier to manage, and better aligned with customer expectations.

- ✓ Brand Consistency
- ✓ Hosted Deployment
- ✓ Conversion Focus
- ✓ Payment Mode Control
- ✓ Smoother Customer Journey

HOSTED & BRANDED CHECKOUT BENEFITS

Everything businesses need to create faster, branded, and more flexible checkout experiences for their customers.

Brand Consistency

Deliver a checkout journey that reflects your business through customized branding, visual styling, and a more consistent user experience.

Flexible Payment Display

Choose which payment methods customers see and present the checkout experience in a way that fits your business model.

Faster Deployment

Launch a hosted checkout experience quickly without building the complete payment flow from scratch.

Better Conversion Experience

Reduce unnecessary friction and help customers complete payments through a cleaner, more intuitive checkout journey.

KEY CAPABILITIES

→ Brand Customization

Customize the checkout experience with brand identity, colors, and visual elements that feel native to your business.

→ Payment Method Configuration

Control how payment methods appear and create a checkout journey that is aligned with customer preference and use case.

→ Hosted Checkout Infrastructure

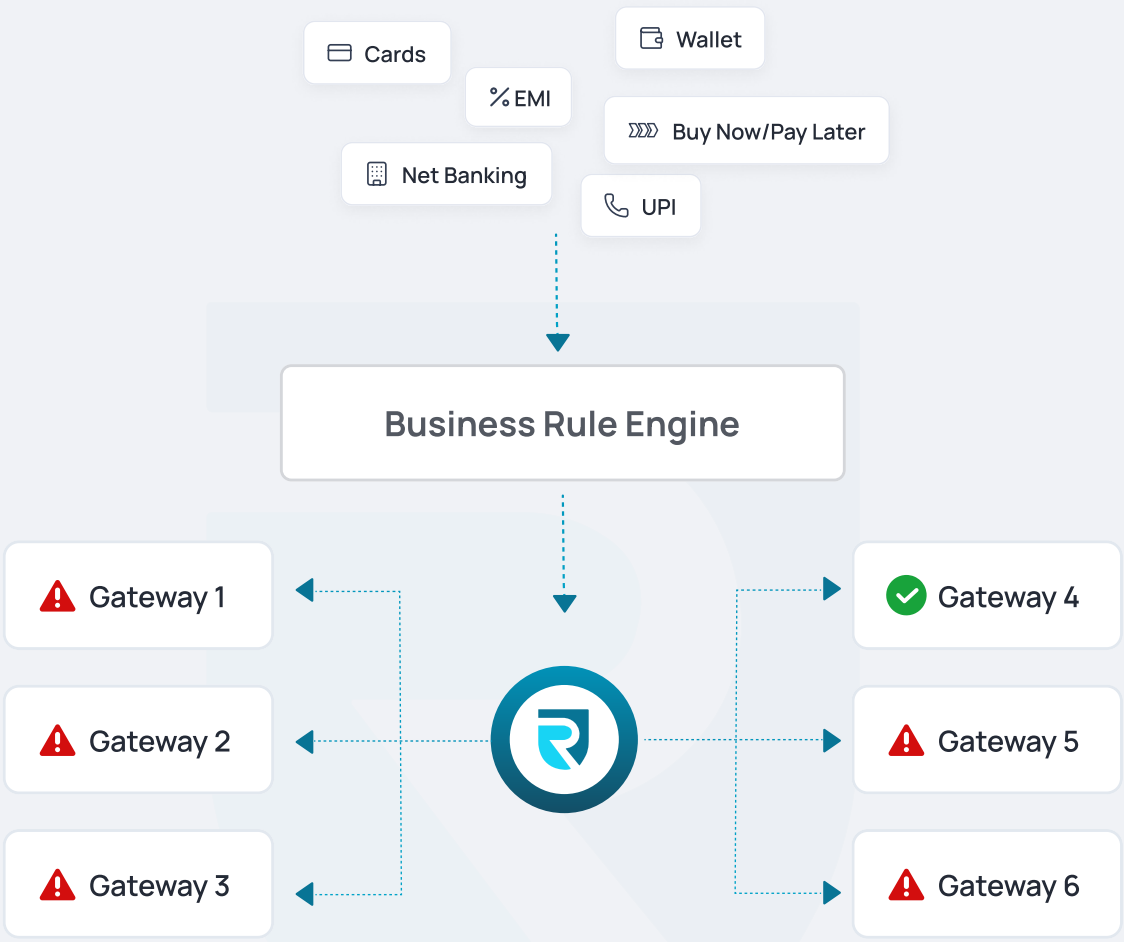
Launch secure hosted checkout flows backed by Urbanrupee's payment infrastructure and operational support.

→ Conversion Ready Experience

Create a payment experience designed to reduce friction, improve trust, and support better completion rates.2

Products

04 / PAYMENT ORCHESTRATION



Urbanrupee enables businesses to orchestrate payments across providers, MIDs, and payment methods from one connected layer. It helps route traffic intelligently, apply fallback when needed, and optimize payment performance with greater operational control.

- ✓ Unified Routing Layer
- ✓ Configurable Rules Engine
- ✓ MID and Gateway Fallback
- ✓ Better Payment Continuity
- ✓ Payment Mode Visibility

WHY PAYMENT ORCHESTRATION?

01

Reduce Complexity

Manage multiple payment providers, methods, and routing paths through one orchestration layer instead of handling fragmented integrations separately.

02

Improve Payment Continuity

Maintain transaction flow with fallback routing, provider switching, and MID cascading when a preferred route is unavailable or underperforming.

03

Route with Intelligence

Apply rules, priorities, limits, and performance signals to direct transactions through the most suitable payment path.

ORCHESTRATION FEATURES

→ Rule Based Routing

Configure routing logic based on business rules, provider preference, cost strategy, or performance requirements.

→ MID Cascading

Move traffic across available MIDs and providers when primary routes hit limits, face issues, or need controlled fallback.

→ Failover Management

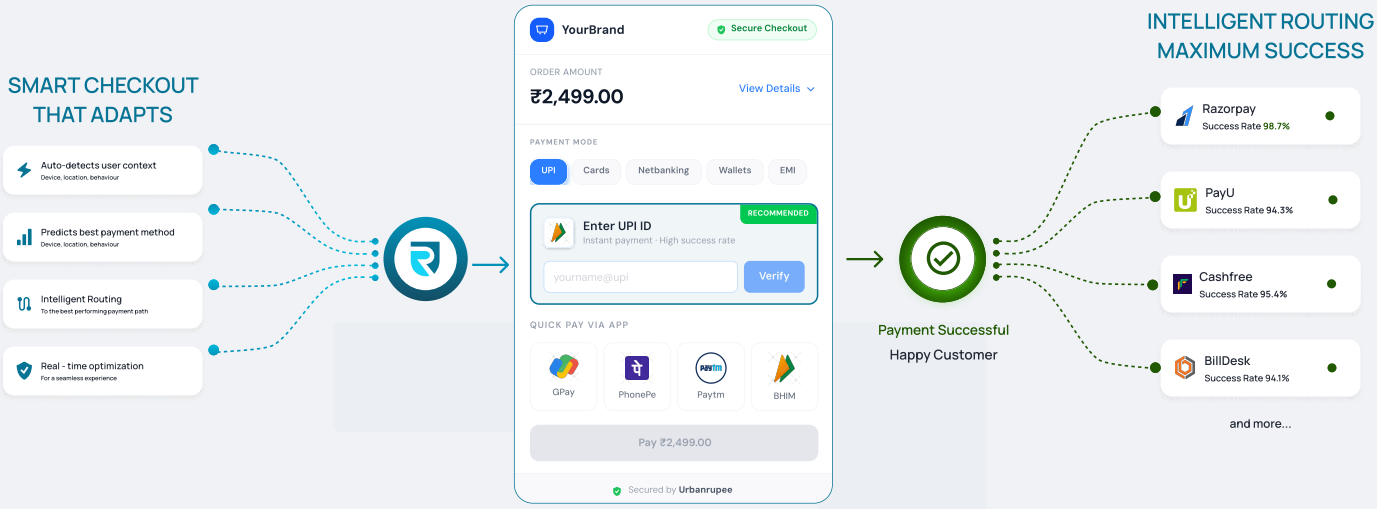
Protect payment continuity by redirecting eligible transactions when a provider or route becomes unavailable.

→ Load and Volume Control

Distribute transaction traffic across providers and payment paths to support operational balance and better performance.

Products

05 / HYPER CHECKOUT EXPERIENCE



Urbanrupee's Hyper Checkout Experience is built to make payments faster, simpler, and more adaptive for the end user. By combining branded checkout, flexible payment method display, and intelligent routing in the background, businesses can reduce friction, improve completion, and create a smoother path to payment success.

It helps merchants deliver a checkout flow that adapts to customer preference while staying aligned with payment performance goals.
By combining front end simplicity with backend routing intelligence, Urbanrupee makes the payment journey more responsive, reliable, and conversion focused.

- ✓ Increase Payment Completion
- ✓ Smoother Payment Journeys
- ✓ Higher Conversion Focus
- ✓ Reduce Checkout Friction
- ✓ Multi Mode Payment Experience

HYPER CHECKOUT BENEFITS

Everything businesses need to create fast, adaptive, and conversion focused payment journeys.

Faster Checkout Flow

Help users move from payment intent to successful completion with fewer steps and a cleaner payment journey.

Flexible Payment Experience

Present multiple payment methods in one hosted flow so customers can choose how they prefer to pay.

Reduced Friction

Simplify the checkout journey with a user centric experience designed to remove unnecessary drop off points.

Better Success Outcomes

Support payment completion with checkout optimization in front and routing intelligence in the background.

KEY CAPABILITIES

→ Adaptive Checkout Experience

Create a payment journey that feels faster, cleaner, and easier for customers to complete.

→ Multi Mode Payment Support

Offer UPI, cards, net banking, wallets, and EMI within one connected checkout flow.

→ Intelligent Routing Support

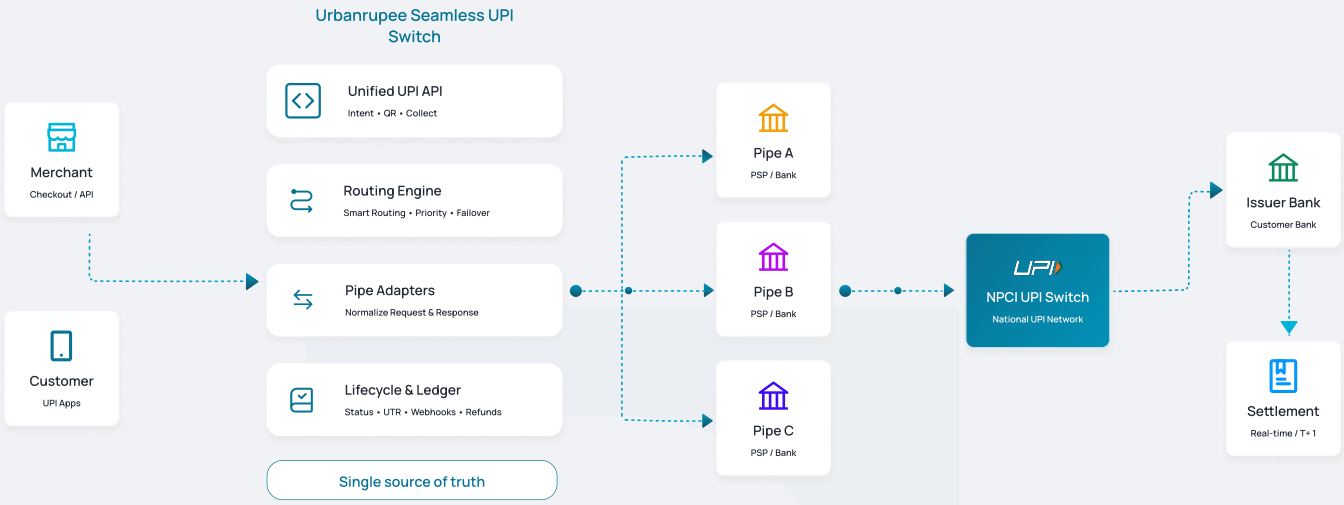
Use orchestration logic in the background to guide eligible transactions through stronger payment paths.

→ Conversion Focused Design

Deliver a hosted checkout experience built to improve trust, reduce friction, and support higher completion.

Products

06 / SEAMLESS UPI SWITCH



Urbanrupee provides a unified UPI transaction layer that connects merchant checkout, routing logic, provider integrations, and payment lifecycle visibility in one seamless flow. It simplifies the complexity of UPI acceptance by bringing control, continuity, and operational clarity into a single framework. By aligning customer payment journeys with intelligent backend orchestration, Urbanrupee enables a more reliable, scalable, and refined UPI experience for modern businesses.

It helps businesses simplify UPI acceptance while improving control over routing, transaction flow, and operational visibility.
By connecting merchant checkout with provider integrations and lifecycle tracking, Urbanrupee enables a more reliable and seamless UPI payment journey.

- ✓ Unified Routing Layer
- ✓ Configurable Rules Engine
- ✓ MID and Gateway Fallback
- ✓ Better Payment Continuity
- ✓ Payment Mode Visibility

WHY SEAMLESS UPI SWITCH?

01

Simplify UPI Complexity

Bring checkout, provider integrations, routing, and transaction lifecycle into one unified UPI layer.

02

Improve UPI Continuity

Use routing intelligence and multiple provider paths to support stronger uptime and more reliable transaction handling.

03

Create Faster UPI Journeys

Deliver smoother customer payment flows across UPI intent and QR while keeping backend orchestration streamlined.

UPI SWITCH FEATURES

→ Unified UPI API

Connect merchant payment flows to UPI acceptance through one simplified integration layer.

→ Routing Engine

Apply business rules and routing intelligence to guide UPI transactions through the most suitable path.

→ Intent and QR Support

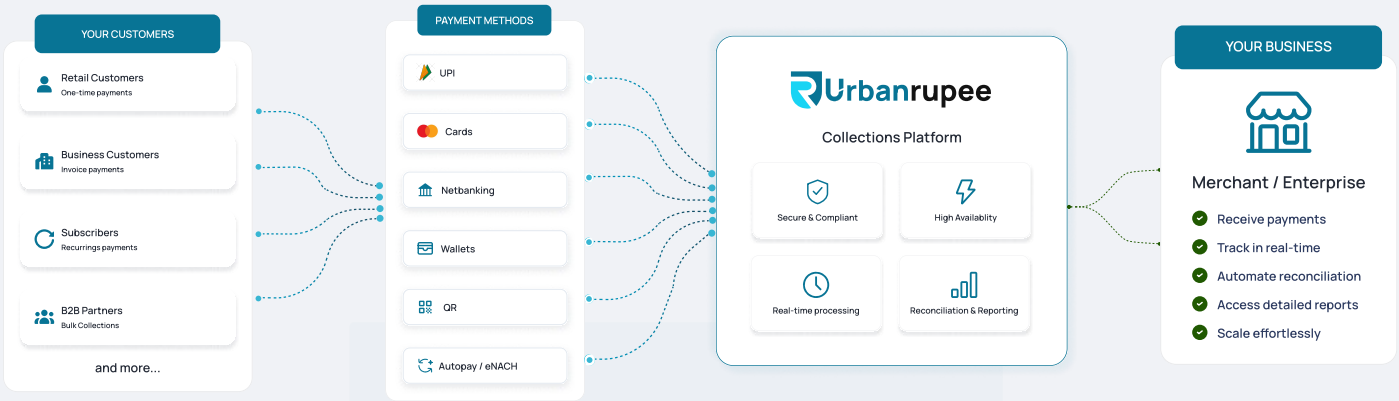
Support different UPI payment experiences through seamless intent and QR based journeys.

→ Reconciliation Support

Improve operational control with better visibility into settlement and transaction outcome status.

Services

01 / COLLECTIONS



Urbanrupee enables businesses to collect payments through a unified payin infrastructure across UPI, cards, net banking, wallets, and EMI. It helps merchants simplify collections while improving reliability, visibility, and scale.

By bringing payment acceptance, merchant operations, and performance visibility into one connected layer, Urbanrupee transforms collections into a more seamless and scalable business capability. The result is a collection experience designed for operational confidence, customer convenience, and sustained growth.

- ✓ Unified Collection Layer
- ✓ Reliable Collections
- ✓ Customer Ready
- ✓ Scalable Payment Acceptance
- ✓ Accept Payment Easily

COLLECTIONS BENEFITS

Everything businesses need to accept, manage, and scale incoming payments through one unified payin experience.

Wider Payment Acceptance

Accept payments across UPI, cards, net banking, wallets, and EMI through one connected collections layer.

Simplified Collection Operations

Manage incoming payments through one structured workflow instead of juggling fragmented payment flows.

Better Payment Continuity

Support more reliable collection journeys with routing intelligence and stronger payment handling in the background.

Greater Merchant Visibility

Stay informed on transaction activity, payment status, and collection performance with clearer operational visibility.

KEY CAPABILITIES

→ Multi Method Acceptance

Support UPI, cards, net banking, wallets, and EMI in one payin framework.

→ Unified Collection Flow

Bring customer payment journeys into one structured and easier to manage collection layer.

→ Transaction Visibility

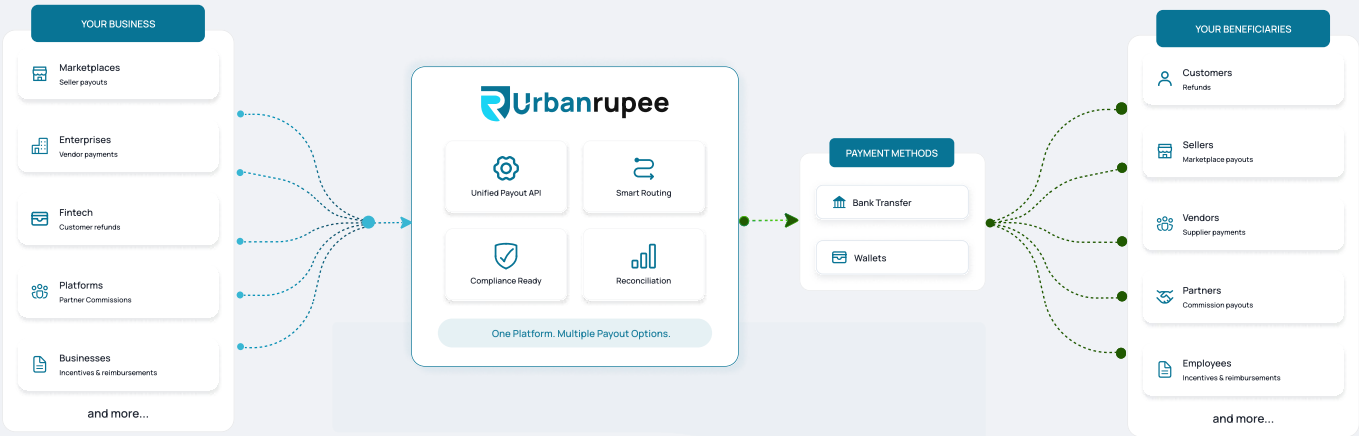
Track incoming payments and payment activity with clearer merchant level visibility.

→ Reconciliation Support

Support smoother collection operations with stronger tracking and operational clarity around payment outcomes.

Services

02 / WITHDRAWAL



Urbanrupee enables businesses to manage payouts through one connected infrastructure for disbursement, tracking, and operational control. It helps simplify outgoing payments while improving visibility, reconciliation, and scale.

By bringing payout workflows, beneficiary management, and operational oversight into one connected layer, Urbanrupee transforms disbursements into a more efficient and dependable business capability. The result is a payout experience designed for speed, control, and operational confidence.

- ✓ Unified Payout Flow
- ✓ Beneficiary Ready
- ✓ Operational Visibility
- ✓ Scalable Disbursement Control
- ✓ Simplify Disbursements

WHY WITHDRAWAL ?

01

Simplify Disbursement Operations

Manage outgoing payments through one structured payout layer instead of fragmented manual workflows and disconnected systems.

02

Improve Payout Control

Track disbursement activity, payout status, and operational flows with better visibility across the payout journey.

03

Support Business Scale

Move money across multiple beneficiary types through a payout infrastructure designed for speed, control, and operational reliability.

KEY CAPABILITIES

→ Beneficiary Payouts

Send payments to customers, vendors, partners, employees, and other beneficiaries through one unified payout flow.

→ Payout Tracking

Monitor outgoing payment activity and status with clearer operational visibility.

→ Reconciliation Support

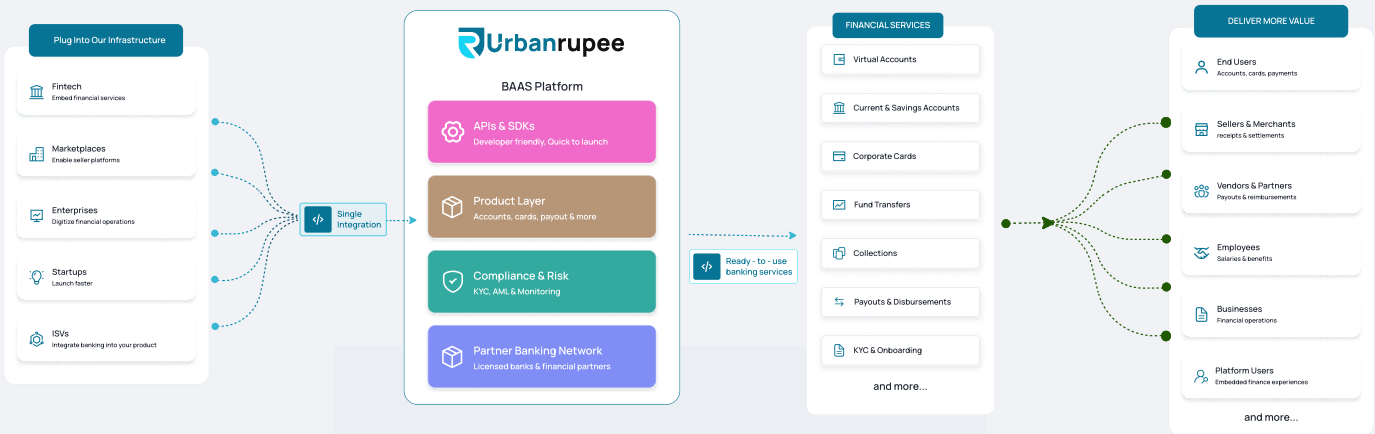
Improve payout operations with better tracking, reporting, and settlement visibility.

→ Multi Channel Disbursement

Support payout journeys across different transfer methods through one connected infrastructure.

Services

03 / FINANCIAL OPERATIONS INFRASTRUCTURE



Urbanrupee provides embedded financial infrastructure that helps businesses manage collections, disbursements, operational visibility, and service workflows through one connected platform. It creates a stronger foundation for scale, control, and operational efficiency across the financial journey.

By unifying financial workflows, merchant operations, and service enablement into one integrated layer, Urbanrupee transforms fragmented processes into a more connected and scalable business capability. The result is an infrastructure experience designed for flexibility, oversight, and long term growth.

- ✓ Embedded Service Layer
- ✓ Operational Visibility
- ✓ Merchant Ready Infrastructure
- ✓ Scalable Financial Workflows
- ✓ Scale With Operational Control

EMBEDDED FINANCIAL SERVICES BENEFITS

Everything businesses need to support financial workflows, operational visibility, and money movement through one connected platform.

Connected Financial Workflows

Bring collections, payouts, merchant operations, and reconciliation together in one service layer.

Better Operational Control

Manage financial activity with stronger visibility across transactions, settlements, and service workflows.

Faster Platform Enablement

Support merchant and business use cases through infrastructure designed for integration, scale, and operational readiness.

Scalable Service Infrastructure

Build on a connected system that supports payment operations and financial workflows without fragmented tooling.

KEY CAPABILITIES

→Payin

Send payments to customers, vendors, partners, employees, and other beneficiaries through one unified payout flow.

→ Payout and Disbursement

Enable outgoing payment workflows for customers, partners, and business operations.

→ Operational Visibility

Access better insight into transactions, settlements, and service activity.

→ Reconciliation Support

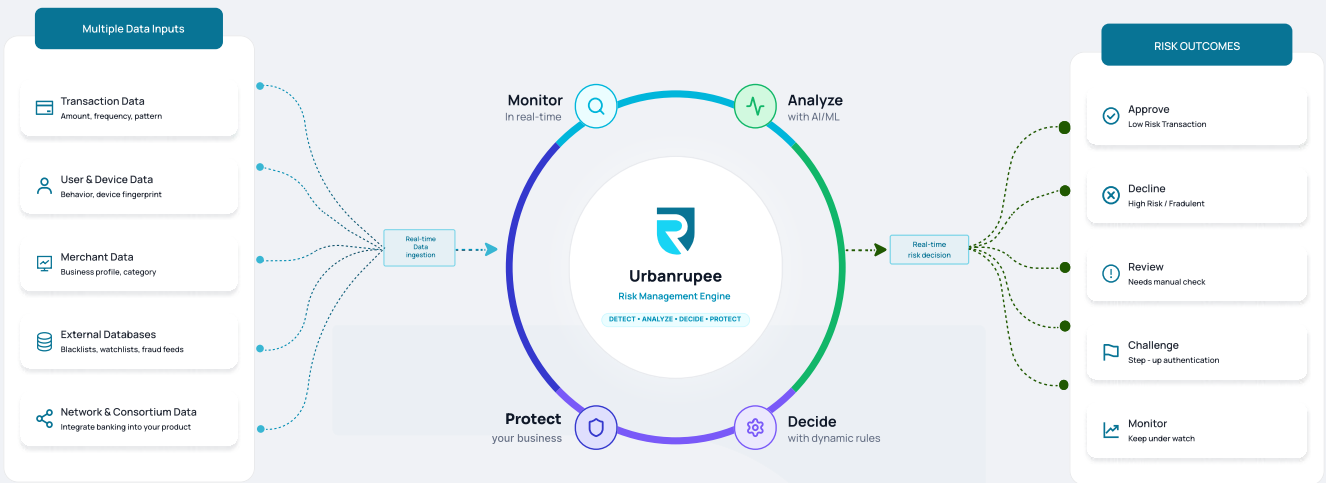
Track and manage financial workflows with stronger reporting and operational clarity.

→ Partner Enablement

Support merchant and partner led financial workflows through one integrated platform.

Services

04 / RISK MANAGEMENT



Urbanrupee helps businesses manage payment risk through monitoring, review, and action led workflows. It equips teams with the visibility and controls needed to detect threats early, respond faster, and reduce operational and financial exposure.

By unifying fraud monitoring, chargeback awareness, and decision based risk workflows into one connected layer, Urbanrupee transforms risk management into a more proactive and intelligent business capability. The result is stronger payment protection, clearer oversight, and greater confidence across the transaction lifecycle.

- ✓ Smarter Risk Detection
- ✓ Faster Investigation
- ✓ Better Dispute Readiness
- ✓ Stronger Payment Protection
- ✓ Fraud Monitoring

WHY RISK MANAGEMENT?

01

Reduce Risk Exposure

Detect suspicious activity earlier and respond with better control across the payment lifecycle.

02

Strengthen Decision Making

Use monitoring, alerts, and review workflows to support faster and more confident payment risk decisions.

03

Improve Chargeback Readiness

Stay prepared for disputes through better visibility into risk signals, transaction behavior, and operational action points.

KEY CAPABILITIES

→ Fraud Monitoring

Monitor transaction behavior and payment activity to identify unusual or suspicious patterns.

→ Risk Review Workflows

Support approve, decline, review, challenge, and monitor actions through a structured risk operations process.

→ Chargeback Risk Visibility

Improve awareness of dispute related exposure through stronger transaction and merchant level visibility.

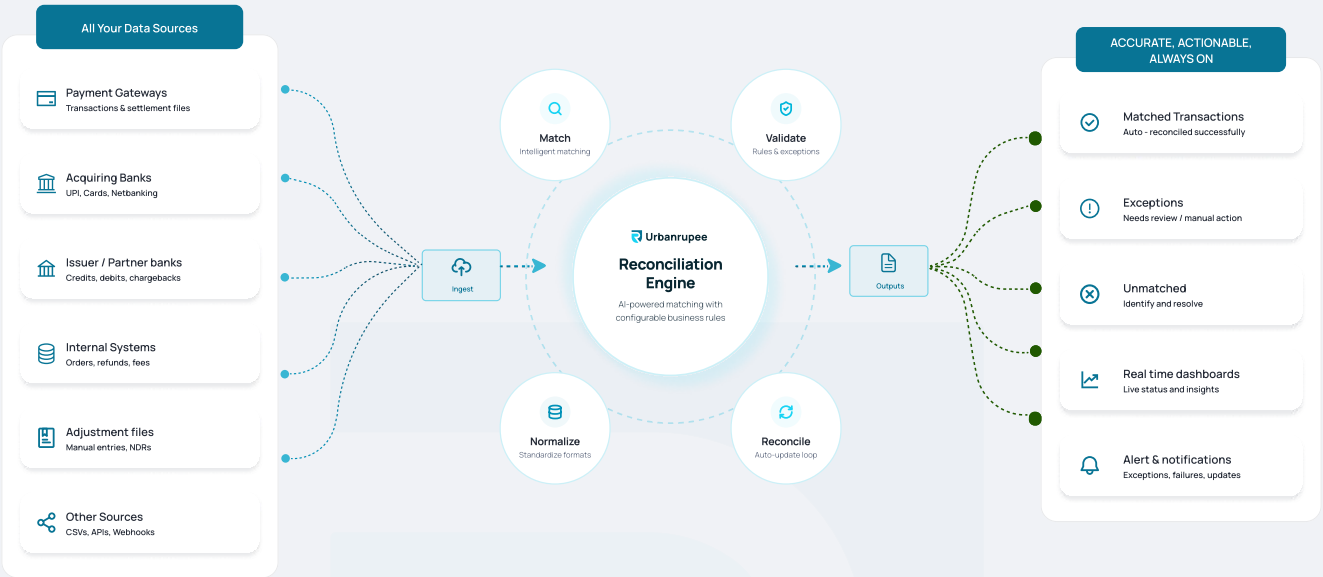
→ Merchant and Watchlist Controls

Manage risk signals, merchant oversight, and watchlist driven monitoring through one connected service layer.

→ Operational Risk Insights

Give teams clearer visibility into payment risk trends, alerts, and performance impact.

05 / RECONCILATION



Urbanrupee helps businesses manage settlements and reconciliation through one connected operational layer that brings together transaction records, payment data, and financial visibility. It improves accuracy, reduces manual effort, and gives finance and operations teams greater control over settlement outcomes.

By unifying settlement workflows, exception handling, and reconciliation visibility into one structured process, Urbanrupee transforms back office operations into a more efficient and dependable business capability. The result is faster resolution, stronger financial oversight, and greater confidence across the settlement lifecycle.

- ✓ Automated Matching
- ✓ Exception Visibility
- ✓ Faster Resolution
- ✓ Improve Operational Accuracy
- ✓ Reduce Manual Reconciliation

Why Choose Us

WHY URBANRUPEE

Built for payment performance.

Urbanrupee combines payment infrastructure, customer experience, and operational control to help businesses build more reliable, scalable, and merchant centric payment journeys.

INTELLIGENT

Use routing logic, provider controls, and MID orchestration to direct transactions through more effective payment paths.

RELIABLE

Support payment continuity with fallback routing, operational visibility, and infrastructure designed for high volume environments.

MERCHANT CENTRIC

Give businesses direct control over checkout, settlements, chargebacks, reporting, and payment operations through one connected platform.

SCALABLE

Support growing transaction volumes, multiple payment methods, and expanding business needs without fragmented systems.

ACTIONABLE

Turn transactions, settlements, routing outcomes, and risk signals into clear operational visibility for faster decisions.

Better infrastructure creates better payment experiences.
